Provides a practical and comprehensive introduction to the key aspects of model-based testing as taught in the ISTQB® Model-Based Tester—Foundation Level Certification Syllabus This book covers the essentials of Model-Based Testing (MBT) needed to pass the ISTQB® Foundation Level Model-Based Tester Certification. The text begins with an introduction to MBT, covering both the benefits and the limitations of MBT. The authors review the various approaches to model-based testing, explaining the fundamental processes in MBT, the different modeling languages used, common good modeling practices, and the typical mistakes and pitfalls. The book explains the specifics of MBT test implementation, the dependencies on modeling and test generation activities, and the steps required to automate the generated test cases. The text discusses the introduction of MBT in a company, presenting metrics to measure success and good practices to apply. Provides case studies illustrating differ-

ent approaches to Model-Based Testing Includes in-text exercises to encourage readers to practice modeling and test generation activities Contains appendices with solutions to the in-text exercises, a short quiz to test readers, along with additional information Model-Based Testing Essentials - Guide to the ISTQB® Certified Model-Based Tester - Foundation Level is written primarily for participants of the ISTQB® Certification: software engineers, test engineers, software developers, and anybody else involved in software quality assurance. This book can also be used for anyone who wants a deeper understanding of software testing and of the use of models for test generation. Anne Kramer, PhD, is Senior Consultant and Project Manager at sepp.med gmbh, a German IT service provider specializing in quality assurance. Dr. Kramer has actively participated in the elaboration of the new ISTQB® Certified Test Model-Based Testing Syllabus. Dr. Kramer teaches model-based testing as part of the sepp.med training portfolio. Bruno Legeard is Professor of Software Engineering at the University of Franche-Comté, co-foun-

der and Scientific Advisor of Smartesting. Prof. Legeard is an ISTQB Certified Tester, member of the French Testing Board (CFTL) and he co-leads at ISTQB—International Software Testing Qualification Board—the writer of the new Certified Tester Model-Based Testing syllabus. He is a member of several program committees in software testing each year and an author of numerous publications in the field. In 2015, he is Program Chair of UCAAT—User Conference on Advanced Automated Testing.

The Standard for Business Analysis - First Edition is a new PMI foundational standard, developed as a basis for business analysis for portfolio, program, and project management. This standard illustrates how project management processes and business analysis processes are complementary activities, where the primary focus of project management processes is the project and the primary focus of business analysis processes is the product. This is a process-based standard, aligned with A Guide to the Project Management Body of Knowledge (PMBOK® Guide) - Sixth Edition, and to be used as a standard framework contributing to the business analysis body of knowledge.

Good requirements do not come from a tool, or from a customer interview. They come from a repeatable set of processes that take a project from the early idea stage through

to the creation of an agreed-upon project and product scope between the customer and the developer. From enterprise analysis and planning requirements gathering to documentation,
